

Do a Doodle

1. Begin in one spot inside the frame and start drawing doodles. Create as many doodles as you like... the only rule is that no doodles should overlap or interfere with any other.
2. You can draw geometric shapes (i.e. squares, circles, triangles) or organic shapes (squiggly lines and shapes).
3. When you have filled your paper, colour them in.
4. You may use solid colour, lines, cross hatching, dots, dashes...
